FUNCTIONAL FIBRES

Meet high-fibre claims while adding functionality to your food products.

CARROT FIBRE
60% FIBRE

Instant swelling capacity without high shear with high water-binding properties, improving yield in various food applications.

CITRUS FIBRE
94.2% FIBRE

Offers excellent gelling properties, making it a strong replacement for modified starches or gums, or replacing fats.

PSYLLIUM FIBRE
88% FIBRE

A natural stabilizer and thickener that also provides elasticity in gluten-free doughs.

FLAXSEED FIBRE
37% FIBRE

Enhances moisture retention and fat stabilization, while also adding bulk and elasticity to various foods.

PEA HULL FIBRE
89% FIBRE

Binds oil and water strongly, improving food product softness and reducing breakage in extruded snacks.

CHIA FIBRE
50% FIBRE

Improves moisture retention while supplying omega-3 ALA and plant protein.

SMART INGREDIENTS, BETTER FOOD.

Not sure where to start?

Our team can help tailor the right solution for your application to maximize fibre content and meet your product goals.
